Transparent color films for creative glass designs 				
GlassColour ASLAN CT 113	Monomeric, printable	3-5	49"	25

The ASLAN Dryapply technology

The unique **ASLAN Dryapply technology** makes application particularly quick and easy. A special structure with extremely fine air release channels guarantees bubble-free application without using liquid. This structure, combined with a special adhesive, allows easy repositioning during application without risk of damage (stress whitening). After application, the adhesive wets out and the adhesive strength increases, making the film ideal even for long-term applications.
