# SparkleColour ASLAN SC 123

Glittering self-adhesive decorative film

This film is characterized by a high number of glitter particles. It sparkles with maximum effect on all smooth surfaces in shopfitting, architecture, events, shows and stage design etc. It can be applied over the entire surface and plotted excellently.

## Characteristics

Face film	Polyester, coated with glitter particles
Thickness	~13.8 mil (plus ~3.9 mil protection film/pre mask)
Adhesive	pressure sensitive polyacrylate adhesive, semi-permanent

## Product benefits

- High amount of glitter particles for perfect light reflection to maximum effect
- High-quality, textured feel
- Very easy to apply
- Clean removal without adhesive residues from e.g. glass and metal
- Very good plotting properties (film is plotted from the back through the liner, design mirrored)
- Supplied with a surface protection film which also serves as the pre mask
- 29 additional colors are available with an MOQ of 550 yards each

# CaressColour ASLAN CC 124

Flocked self-adhesive decorative film

The high-quality flock fibres are applied very densely, offering an impressive soft, velvety feel. The decorative film is therefore ideal as an atmospheric feature on all smooth surfaces used in shopfitting, architecture, events, shows and stage design. It can be applied over the entire surface but is also excellent for plotting.

## Characteristics

Face film	Polyester, coated with flock
Thickness	~1.9 mil (plus ~15.7-17.7 mil flock fibres)
Adhesive	pressure sensitive polyacrylate adhesive, semi-permanent

## Product benefits

- Dense flocking for atmospheric surfaces
- Soft velvety feel
- Very easy to apply
- Good removal without adhesive residues from e.g. glass and metal
- Very good plotting properties
- 9 additional colors are available with an MOQ of 550 yards each
