Self-adhesive films for
sign making & digital printing

ASLAN®

EXPERTISE IN SELF-ADHESIVE FILMS

ASLAN – where quality meets specialties

Since 1950 leading manufacturer ASLAN Selbstklebefolien GmbH has been successfully developing, producing and distributing self-adhesive films for a wide variety of applications. As a specialist in self-adhesive films, ASLAN offers innovative and high-quality branded products with the quality assurance of being “Made in Germany”.

Our comprehensive product range offers self-adhesive films for various markets and applications such as graphic applications (sign making and digital printing), painting and lacquering, sandblasting, architecture and interior design, office and organisation, the production of lamp shades, book protection and repair, hobby and crafts, medical technology, industrial applications and contract coating.

The applications for ASLAN self-adhesive films are as varied as the needs of the markets they serve. ASLAN focuses on developing customised solutions rather than producing high-volume products for mass markets. Individual customer needs and market requirements continuously generate new ideas which ASLAN turns into high-quality self-adhesive films. Stringent quality standards and “Expertise in self-adhesive films” form a solid basis for the future growth of ASLAN.

A wide portfolio of branded products and custom self-adhesive solutions

Today the ASLAN brand covers a wide portfolio of self-adhesive films for an extremely broad variety of applications:

- Sign making & digital printing
- Painting & lacquering
- Sandblasting
- Architecture & interior design
- Lamp shades
- Books, office & education
- Hobby & crafts
- Industrial applications
- Medical technology

Our product range is as varied as these applications. Eco-friendly solutions for a growing market have their place alongside customised products for highly specific applications:

- Whiteboard & blackboard films
- Glass decoration films
- Metal effect films
- Colored films
- Digital printing & laminating films
- Stencil films
- Double-sided self-adhesive films
- Mounting films & tapes
- Book protection films
- Lamp shade films
- Various films for special applications

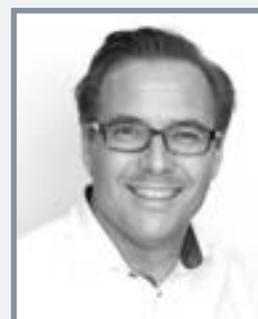

In addition to a comprehensive range of standard products, ASLAN also offers fully customised and environmentally friendly adhesive coatings to its customers.

Tailor-made solutions are developed in dialogue with the customer. Customers can choose from a variety of materials, liners and adhesives or have their own materials coated – with the adhesive properties they specify or in consultation with the experts at ASLAN.

„Where quality meets specialties.“
To keep it short and simple: This slogan stands for everything ASLAN represents, developing and manufacturing high-quality self-adhesive films for 70 years now. Our unique niche products are being distributed worldwide and are being used where one needs more than ordinary.

We are proud of these values. Our employees at ASLAN work every day to offer the best products in the market, combined with a high level of customer service orientation. But we can do more than that – challenge us.

Martin Geveke

Memo board films

ASLAN's self-adhesive blackboard, whiteboard and ferrous films can be used to turn smooth surfaces into re-writable, dry-wipeable and even magnetically-receptive surfaces for communication.

To do this, the high-quality films are simply affixed to walls, cupboards or doors. Thanks to the virtually endless variety of options for combining ASLAN films, you can give your creativity free rein and design your own customised memoboard. Colored boards or whiteboards can be created just as easily as memoboards with a logo or design printed on them.

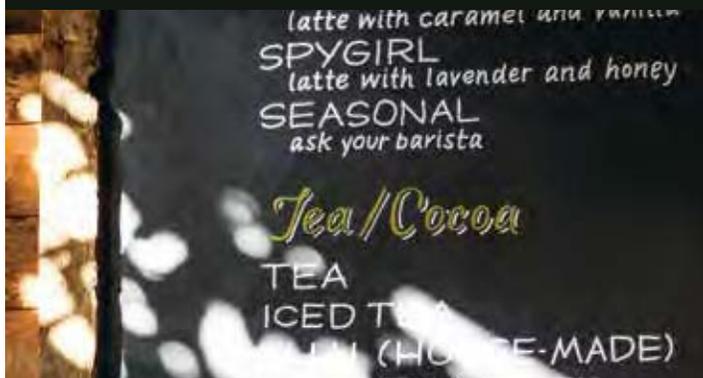

Create tailor-made communication boards for offices, seminar rooms, schools, kindergartens, restaurants or hotels!

**Re-writable
glass decoration film**

White board films

Black board films

**Magnetically-receptive
ferrous films**

Our high-quality self-adhesive blackboard films are the ideal alternative to heavy chalkboards or blackboard paint. These films can be applied to all smooth surfaces quickly and cleanly and removed again just as easily. Writing with chalk or liquid chalk pens (see table) does not leave any ghosting or shadows – this makes them the ideal medium for frequently changing messages.

Unique: In addition to designs in traditional black, a clear chalkboard film is also available offering you complete design freedom. Simply laminate over a print, colored film or a flat piece of furniture and your custom-designed chalkboard is ready to go!

Magnetically-receptive ferrous films

Magnetically-receptive, self-adhesive ferrous films, anthracite colored

This self-adhesive ferrous film makes any smooth surface suitable for placing magnets. It can be cut easily into any imaginable shape or size and can be combined just as easily with other self-adhesive ASLAN films to create a multi-functional whiteboard, blackboard or colored memoboard.

FerroSoft ASLAN FF 410 

Printable, magnetically-receptive, self-adhesive ferrous films in white

With this white, matte ferrous film containing iron, any surface becomes suitable for placing magnets. It is digitally printable, allowing you to create custom-designed magnet boards. In combination with our clear chalkboard and whiteboard films it can additionally be written on with chalk or whiteboard markers.

FerroSoft Print ASLAN FF 480

Self-adhesive ferrous film with high-quality whiteboard finish

These films are offering a ready-made 2-in-1-solution: They combine the magnetically-receptive function of our flexible ASLAN FerroSoft films with the easy write and wipe function of our whiteboard films. Thus, you can create a high-quality, multi-functional communications surface in just a single pass.

FerroSoft Whiteboard ASLAN FF 550  | **FerroSoft Whiteboard matt ASLAN FF 490**

Self-adhesive, magnetically-receptive ferrous film with high-quality blackboard finish

The FerroSoft Blackboard ASLAN FF 540 combines the magnet receptivity of our FerroSoft range with the ideal writability and cleaning of our Premium Blackboard. It can be written by using chalk and liquid chalk. Applied to a smooth surface a high quality, magnetically-receptive and scratch-resistant blackboard is done.

Up to three layers

of ASLAN ferrous papers will mount safely to ASLAN's magnetic film

Flexible, self-adhesive magnetic film

ASLAN's first magnetic self-adhesive film opens up new opportunities for creating retail spaces, points of purchase/sale or exhibition stands. Applied to flat and smooth surfaces, MagneTack ASLAN MT 400 is the perfect area to place ASLAN's printable ferrous papers for your short-term marketing messages or special offers. Due to the film's high barium and strontium ferrite level, up to three layers of ASLAN ferrous papers can mount safely to the surface without curling or sliding off. Furthermore, the film is easy to apply since its flexibility and thickness of 15.7 mil allow easy handling.

New MagneTack ASLAN MT 400

Printable ferrous papers

Ferrous papers are foolproof and bubble-free to apply to the magnetic film MagneTack ASLANMT 400. The white surface is printable with solvent, eco-solvent, latex and UV curable inks. Applied and repositioned within seconds, ferrous papers are the best way to present your short-term marketing message or special offers to your customers. Up to three layers of ferrous papers will mount safely to ASLAN's magnetic film and they are fast and easy to change.

Glossy whiteboard films

Especially scratch-resistant and high-quality self-adhesive films for writing with whiteboard markers

These films can be applied onto any smooth surface, such as doors or walls. Writing with whiteboard markers can be easily wiped off dryly using a soft cloth. Even frequent rewriting causes no ghosting or shadows.

Available versions:

Glossy whiteboard film in white

Whiteboard ASLAN WB 995

Glossy whiteboard film, clear

Clearboard ASLAN CB 90

Glossy whiteboard film in 6 colors*

WhiteboardColour ASLAN WBC 996

*Additional colors are available on request.

Glossy whiteboard films for dry application

High-quality self-adhesive whiteboard films with air release channels for a bubble-free dry application onto large areas

These films are extremely scratch-resistant and can be written on any number of times with whiteboard markers – with no trace of ghosting or shadows.

Available versions:

Glossy whiteboard film for dry application in white

Whiteboard Dryapply ASLAN WBL 995

Glossy, PVC free whiteboard film for dry application in white

Self-adhesive rear projection films in two different versions

The ASLAN rear projection films are the ideal medium for striking, high-impact presentations of videos, live broadcasts and images. Applied onto a rigid, clear surface, they create a projection surface that can be operated with standard projectors as well as interactive projection systems.

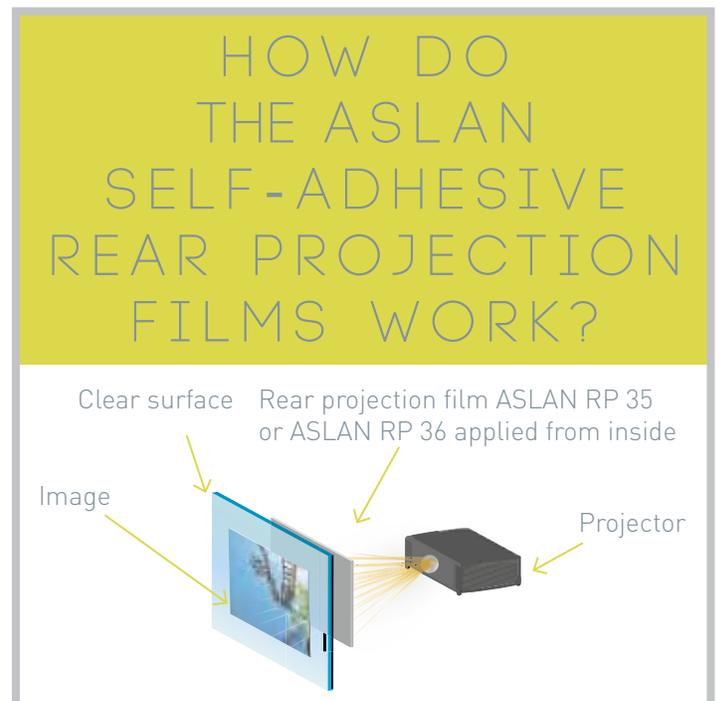

Both, the translucent as well as the clear variant, are characterised by their uniform reproduction quality, visibility even in bright environments and particular high color brilliance with applications behind glass.

The clear version provides a clear view: Backgrounds, for instance objects exhibited behind a shop window, can be incorporated creatively into multimedia design concepts. When in use with a projector, the film provides superb rendition.

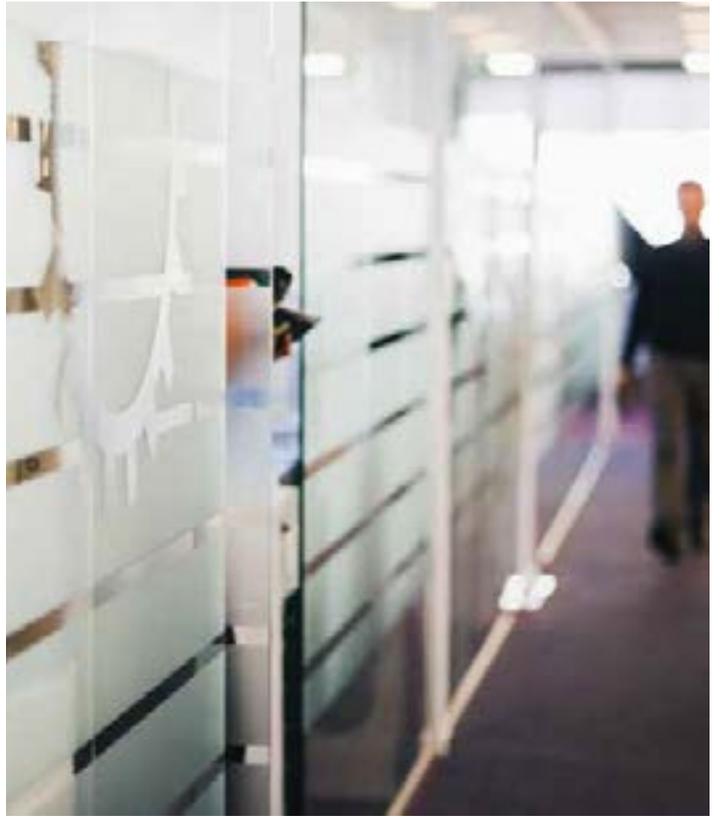

Available versions

ASLAN glass decoration films

ASLAN's comprehensive range of self-adhesive glass decoration films offers a unique breadth of effects and colors for the graphics market, allowing striking and high-quality decoration both indoors and outdoors. Thanks to their ease of use, these films can be easily applied in any room. ASLAN Dryapply Technology makes application to large surfaces especially user-friendly (see page 14).

Lending glass surfaces a special look and structure, these self-adhesive films can be digitally printed and/or plotted. For safe use in public areas, many glass decoration films from ASLAN are fire safety classified according to Euroclass EN 13501-1.

Glass decoration films for easy dry application

The unique ASLAN Dryapply Technology makes application particularly quick and easy. A special structure with fine air release channels guarantees bubble-free application without using water. This structure, combined with a special adhesive, allows easy repositioning during application without risk of damage (stress whitening). After application, the adhesive wets out and the adhesive strength increases, making the film ideal even for long-term applications.

Glass decoration films for large surfaces and plotted lettering

GlassColour ASLAN CT 113

The transparent colored film for creative glass decoration

These transparent colored films allow stunning effects on glass surfaces, which are a mainstay of modern architecture and interior design. Colorful and creatively designed glass facades, conference rooms or shop windows can be easily realised. New and improved adhesive technology further enhances the films' quality: A high level of transparency guarantees a clear view through applied films. For even more effects, the film is printable using solvent, eco-solvent, latex or UV curable inks.

Design floors in a whole different way and use them for eye-catching advertising! Whether for indoor or outdoor advertising, smooth or rough surfaces: ASLAN offers the right solution for every surface. For this application we provide various digital printing films that can be combined as required with slip-resistant floor graphics films. As a special advantage, the printed and laminated floor graphics are fire-rated as a complete, bonded unit.

Outdoor applications

	For short-term applications on a wide variety of rough surfaces such as pavements, entrances, paving stones and outdoor staircases, easy and fast to remove.	WrapTheStreet ASLAN DFP 46	  
For rough floors (e.g. asphalt)	White, slip resistant (R9), directly printable, no laminating film required. For short-term applications on a wide variety of rough surfaces such as pavements, entrances, paving stones and outdoor staircases, easy and fast to remove.	Print'nGo Street ASLAN DFP 36	
For smooth floors	No discoloring of stone surfaces by ink or adhesive, removable from smooth floors in one piece and without leaving residues, for temporary floor graphics, e.g. on marble or natural stone.	WrapTheFloor ASLAN DFP 47	 

Indoor applications

	White, slip resistant (R9), directly printable, no laminating film required	Print'nGo ASLAN DFP 33	 
Slip-resistant floor graphics films for smooth surfaces	White, highly slip-resistant (R12), also for barefoot walkways, directly printable, no laminating film required	Print'nGo ASLAN DFP 43	
	Clear, highly slip-resistant (R12), also for wet barefoot walkways, directly printable, no laminating film required	Print'nGo ASLAN DFP 44	
For smooth floors	No discoloring of stone surfaces by ink or adhesive, removable from smooth floors in one piece and without leaving residues, for temporary floor graphics, e.g. on marble or natural stone	WrapTheFloor ASLAN DFP 47	 
For carpets	For temporary use on short-pile carpets, can be removed in one piece without leaving residues or damaging/discoloring the carpet	WrapTheCarpet ASLAN DFP 49

Special advantages of the ASLAN floor graphics solutions

The ASLAN floor graphics range includes both digital printing films and protective laminates that meet the requirements of slip resistance classes R9 and R12. The R9 certified self-adhesive films meet the minimum requirements for indoor floor coverings in general areas while the R12 certified versions meet the requirements of the second highest slip resistance class, required for use in commercial kitchens and guest rooms for example. In addition, the R12 films also meet the standard for slip resistance in wet barefoot areas according to DIN 51097 (class C) as applicable in, for example, the changing room areas of swimming baths or in entrance areas.

For its floor graphics range, ASLAN offers an unparalleled fire classification according to Euroclass EN 13501-1. This applies to all digital printing films used in conjunction with the floor graphics protective laminate

FloorProtect ASLAN MP 326 or **Premium FloorProtect ASLAN MP 300**. What's so special about them is that these composites made from digital printing film and laminate are classified in their printed state.

Digital printing film for applications on PVC materials

This white, matte digital printing film is perfectly suited for applications on PVC materials. Using this self-adhesive film makes it easy to update contents that are already printed on PVC materials – for example changing dates of annually recurring events or eye-catching announcements. The film removes clean for minimum three months and its grey adhesive ensures a high opacity.

Printable with solvent, eco-solvent, latex, UV curable inks and screen printing

WindowBlock ASLAN DFP 25

Printed blackout film
WindowBlock ASLAN DFP 25

Reversely printed on clear film
LifeTime Removable
ASLAN DFP 41

This highly opaque self-adhesive blackout film is white on both sides, making it ideal for double-sided advertising on glass surfaces. The high opacity of the blackout layer prevents digital prints from showing through.

In combination with a clear digital printing film printed with a mirror image, glass surfaces can be used for double-sided advertising that is applied from inside the glass. This offers perfect protection against vandalism.

Product advantages

- Unique product: white on both sides with high opacity
- In combination with a clear digital printing film printed with a mirror image, advertising can be applied on both sides of glass
- The high opacity prevents prints from shining through
- Thickness of 7 mil provides easy application
- Films can be easily removed, even after years

WindowBlock ASLAN DFP 25

Universal digital printing films for long-term applications

A very strong adhesive makes these polymeric digital printing films the ideal solution for long-term applications. The films provide a high level of adhesion, making them perfect for applications that require permanent adhesive or for challenging surfaces such as non-polar surfaces, as can be found on plastic dustbins.

A double-sided, PE coated silicone liner makes them highly resistant to moisture and heat and guarantees perfect printing results.

Product advantages

- Polymeric digital printing film with outdoor durability of 7 years
- For application temperatures from 5 °C
- Special adhesive with very high adhesive strength
- Especially suitable for challenging, uneven and/or non-polar surfaces
- Ideal for application onto rough indoor walls

Highly translucent digital printing film for illuminated signs

With its silk-matte surface and an especially high translucency, this white digitally printable, self-adhesive film is ideal for backlit applications.

A structure of extremely fine air release channels permit dry application of the film. Air bubbles can be wiped out with ease, making application fast, clean and efficient.

UV-PrintProtect ASLAN SL 27

Clear, matte PVC film, monomeric softened, or protection of UV prints indoors and outdoors

UV-PrintProtect Matt ASLAN SL 28

PVC free films

The use of PVC free self-adhesive materials is becoming more important to customers these days.

Plasticizer-free materials are required for indoor applications as well as public spaces.

Many large companies already prescribe their use for reasons of sustainability and to ensure a physiologically harmless environment.

In addition, PVC free alternatives such as polypropylene avoid the formation of hydrogen chloride and hydrochloric acid during disposal and are therefore more environmentally friendly and easy to recycle within the material cycle.

Within our extensive range, we already offer a variety of PVC free options, which will be further expanded in the future. So you can choose today and in the future whether PVC or PVC free products are being used.

In addition to the aspect of sustainability, the PVC free materials also offer the added value of dimensional stability – a shrinkage similar to PVC does not occur.

Stencil films

For more than 30 years, ASLAN has been offering self-adhesive stencil films for painting and lacquering applications, standing out as the recognized specialist in this field.

Whether on smooth surfaces, textiles or rough walls: ASLAN has the right stencil film for you, supporting you in achieving best results in specifically your painting or lacquering application.

As a specialist and market leader in self-adhesive stencil films, ASLAN offers a comprehensive portfolio covering wide-ranging applications.

PremiumMask ASLAN 85 K

The highly flexible self-adhesive stencil film for painting and lacquering works

This self-adhesive stencil film is especially flexible and suitable for all lacquering and painting applications on plain and curved surfaces. It can be removed without leaving any residues.

- The world's most popular universal, highly flexible stencil film
- Tear-proof and easily removable
- For overlapping and multiple lacquering with touch-dry colors
- Ensures sharp contours, preventing paint from running underneath the film
- Suitable for high-temperature lacquering on vehicles

WallMask ASLAN S 41 – The stencil film for rough walls and facades

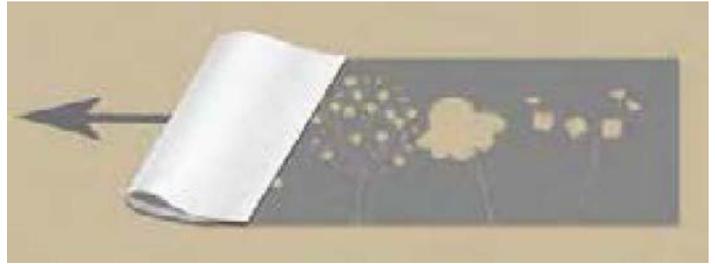

This highly flexible stencil film allows easy, sharply contoured lettering on rough walls and facades, turning them into permanent advertising or decorated spaces.

Product advantages

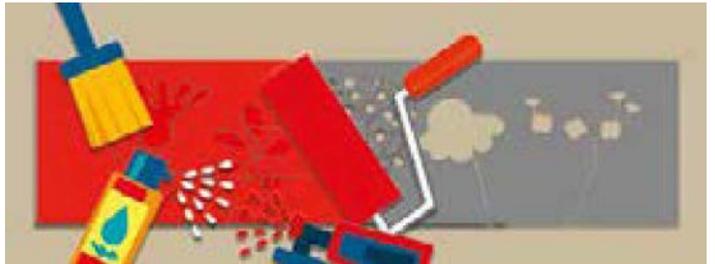

- Highly flexible PVC film, fits into joints and recesses
- Adheres perfectly to all rough indoor and outdoor walls
- Ensures sharp contours, thus no paint can run underneath the film
- Removable without leaving residues
- Tear-resistant
- Suitable for multiple paint applications
- Allows quick, cost-efficient facade lettering

Stencil films for sandblasting works

These self-adhesive stencil films, coordinated perfectly with various stone and glass surfaces, allow sharply contoured, relief-type structures, texts and logos or matte surface finishes. The range includes sandblasting films for a wide variety of sandblasting depths and surfaces.

The sandblasting films are highly robust and pressure-resistant and will not be damaged by the sandblasting process. Thanks to a special adhesive technology, they can be easily removed from glass, marble, granite and metals without leaving any residues.

For very heavy duty works

- 3.15 mil, PVC film, transparent
- Color: grey-green

Sandblast 80 ASLAN S 69

NEW MultiStitch Embroidery ASLAN ME 70

Embroidering stabilizer, non-woven in black or white

Self-adhesive non-woven material in black or white, which is perfect for machine embroidery. Even sensitive fabrics or small objects that cannot be fixed in the hoop, can be embroidered by using MultiStitch Embroidery. Optimal adhesive force avoids material's slipping while embroidering and after the embroidery process only the used area of the non-woven has to be removed – of course residue-free. To reduce machines' set-up times and downtimes, simply paste another piece of MultiStitch Embroidery over the used area.

- 50 g/m², PET/CV non-woven
- Colors: black, white

Product advantages

- Fixing garments, without tensioning into the hoop
- No slipping due to the optimal adhesive force
- Non-woven is removable residue-free
- Robust non-woven gives stability to garments while processing
- Avoids stretching or warping of fabrics
- No adhesive on the needle
- The yarn does not tear
- Embroider multiple motifs simultaneous next to each other

Illuminated signs

Diffuser film for ideal light diffusion in light boxes

In thin light boxes, the light source can be very close to the front panel. This means that the light source is visible, making the illuminated surface look uneven.

The Diffuser ASLAN D 160 film avoids this by spreading the light ideally and providing consistent illumination.

Diffuser ASLAN D 160

Opaque blackout films for light boxes

This opaque PVC film in double-layer quality is especially designed for blocking out areas in illuminated advertising.

Fully opaque, white film with black reverse side

Blockout ASLAN W 15

Fully opaque, black film with white reverse side

Double sided

self-adhesive films

ASLAN's double-sided self-adhesive films can be used to turn maps, prints, posters and other non-adhesive materials into high quality self-adhesive products quickly and easily. Lined with a pH-neutral adhesive, they are suitable for a wide range of surfaces and can be applied without spray adhesives.

For easy manual application, they are equipped with release liners on both sides.

Double-sided self-adhesive film with good flatness, permanent | permanent

Ideal for creating self-adhesive sheets. Highly stable, with both sides adhering permanently and reduced initial adhesion.

Premium MountFilm ASLAN DK 1

Double-sided self-adhesive film, permanent | permanent

For both smooth and rough surfaces. Both sides are lined with permanent adhesive: reduced initial adhesion on one side, extra strong adhesion on the other side.

MountFilm HighTack ASLAN DK 3

Double-sided self-adhesive film, permanent | removable

Ideal for all smooth surfaces. Removable adhesive on one side, permanent adhesive with reduced initial adhesion on the other side.

MountFilm Remove ASLAN DK 4

Double-sided self-adhesive films

Clear PVC films, liner on both sides, for self-adhesive finishing of printed products

Double-sided permanent adhesion, with low initial tack ideal for pre-cut sheets

PremiumColour ASLAN C 118 Soft	Opaque premium color films, for long-term use	7	30 glossy and 2 matte colors
EcoColour ASLAN C 114	Universal opaque color films	3-5	31 glossy and 23 matte colors
FluoColour ASLAN CL 70	Fluorescent films	9 12 months	Red Yellow
GlassColour ASLAN CT 113	Transparent colored films	3-5	25 colors, printable
EcoPlot ASLAN PP 112	Universal opaque color film, PVC free	2	Black White

For painting and lacquering works

Stencil films

PremiumMask ASLAN 85 K	Stencil film for smooth surfaces		Grey, translucent
PremiumMask HighTack ASLAN 85 G	Stencil film for smooth surfaces, with strong adhesion		Grey, translucent
PaintMask ASLAN S 79	Stencil film for truck curtains and other smooth surfaces		Grey green, translucent
WallMask ASLAN S 41	Stencil film for rough walls and facades		Grey, translucent
TextileMask ASLAN S 390	For painting and spraying work on uncoated textiles, PVC free		Grey, transparent

For sandblasting works

Sandblast 600 ASLAN S 62	Sandblasting film for heavy-duty sandblasting on stone		Creme, translucent
Sandblast 330 ASLAN S 64	Sandblasting film for heavy sandblasting on stone		Grey, opaque
Sandblast 230 ASLAN S 66	Sandblasting film for medium-duty sandblasting		White, opaque
Sandblast 180 ASLAN S 68	Sandblasting film for medium-duty sandblasting		Grey, transparent
Sandblast 80 ASLAN S 69	Sandblasting film for light sandblasting on glass		Grey green, transparent

Embroidering stabilizer

MultiStitch Embroidery ASLAN ME 70	Self-adhesive embroidering stabilizer, non-woven, PVC free		Black White
---	--	--	---------------

Illuminated signs

Blockout ASLAN W 15	Blockout film – black adhesive side	7	White
Blockout ASLAN W 16	Blockout film – white adhesive side	7	Black
Diffuser ASLAN D 160	Diffusion film for optimal light distribution	7	White, translucent
GlassColour ASLAN CT 113	Transparent colored films	3-5	25 colors, printable

Double-sided self-adhesive films

Premium MountFilm ASLAN DK 1	Double-sided permanent with low initial tack		Clear
MountFilm HighTack ASLAN DK 3	Permant with low initial tack Permanent		Clear
MountFilm Remove ASLAN DK 4	Permant with low initial tack Removable		Clear
